Integration

The Hesabate system offers full integration between all company departments, streamlining information and data exchange and reducing the need for manual data entry.

Automation

It keeps things like accounting, managing inventory, buying and selling, and other tasks that take time and work to do manually safe and organized. Hesabate is a program that lets all of the data and information in an organization work together. Data is kept and shared in one central database, ensuring that all departments and units use the exact and correct data.

Efficiency improvement

It assists in enhancing work efficiency and resource management by lowering administrative costs, making better use of available resources, making operations simpler, and easing administrative burdens. Processes are done more quickly and correctly, which helps the organization become more productive.

Generate reports

It gives accurate and detailed accounting and management reports, which help the organization's leaders make good decisions and keep an eye on how things are going.

Scalability

Hesabate accounting program can expand as the organization's needs and growth change. This makes it an ongoing solution that will work.

Operational coordination

Hesabate is a program that helps the organization coordinate and organize many tasks, from entering orders and purchases to managing inventory and accounting. Workflow is better, and mistakes caused by manual work are less likely to happen.

performance monitoring

Hesabate program provides reports and performance indicators that help monitor and analyze the organization's performance. Management can look at financial data, statistics, and critical indicators. With this information, they can make suitable strategic decisions.

planning and forecasting

Hesabate program provides the ability to plan and forecast future resources and demands. The organization can look at past data, predict future needs, and take steps to ensure it has the resources it needs.

● Hesabate HR:

The working management system and salaries in Hesabate is a system designed to streamline the process of managing employee time and wages. Managing time and salaries in institutions and companies makes it easier and more organized. Through the time and payroll management system, companies and institutions can organize and simplify the processes of managing employees and their salaries reliably and effectively. This helps achieve financial balance and improve human resources management.

These procedures can be more easily managed because of the system's built-in capabilities and features, which include:

Keeping track of employees' arrivals and departures:

The system lets you keep track of employees' arrivals and departures and check back on them. Automatically, whether by fingerprint scanners, personal identification cards, or even by responding online.

How to calculate salaries and bonuses:

The system figures out employees' salaries by taking into account < Certain things, like working hours, Basic wages, incentives, and bonuses. It can also figure out things like taxes and salary deductions.

Keeping track of employees' arrivals and departures:

The system has a way to manage and keep track of employees' requests for time off and leave. It helps organize and plan work and gives reports and statistics about employees' attendance and absence.

Putting out financial reports:

The system can put out financial reports about employee salaries, such as monthly payroll reports, withholding taxes, bonus reports, and bonuses.

Legal rules:

The system follows the laws and regulations in place. A link to time management and payroll ensures that business operations are legal and follow the rules—and money reports.

The system can link time and payroll data with the other parts of the Hesabate program, such as Managing accounts and inventory, so that accounting information is unified and accurate.

The system gives detailed reports and numbers about how much salaries and expenses cost. Which lets management make good decisions about money and look at how well employees are doing.

The system can send employees automatic reminders and notifications about their appointments—paychecks and important dates related to work and salaries. The system lets you set access levels and permissions for different users. This lets you control who can see information about working hours and wages and protects your security and privacy.

mms
manarah modern software co.

mms
manarah modern software co.

The system has a simple user interface that lets people enter information. You can quickly get to data and do many different things with ease.

The system can handle different paying methods, such as transferring salaries directly to a bank account or printing payroll checks.

It can be tailored and change salary and time models to fit the organization's or company's needs.

The system can store and manage personal information about employees, like contact information and details about their jobs, so that it is easy to access and update.

The system gives you options for calculating salaries because you can change how wages are defined. To fit with the structure and rules of the organization, including figuring out the basic salary, bonuses, incentives, and deductions.

The system works with accounts for temporary workers, temporary contracts, and part-time workers. Different types of jobs can have other wages and benefits.

The system makes it possible to keep track of taxes, social security, and health insurance. It is calculated and deducted automatically based on the laws and rules in the area.

The system can make many reports about wage rates and payments, such as detailed reports of monthly and annual salaries, taxes and deductions, and so on. There are reports on cash records and expenses.

The system has a way to keep track of bonuses and extra rewards. Bonuses and additional prizes can be set up and calculated. Reward employees based on the standards set and how well they do independently.

● Hesabate App Android & IOS:

Application for managing sales and requests outside the office, as well as a way for employees to keep track of all their issuances and contact Hesabate if the Internet is accessible.

● Hesabate Hotels:
